## SUMMARY

---

I am an energetic team player looking to expand into the tech world. As a front end product developer and recent new grad from UCLA, I am always looking at the newest and best technologies to create applications that feel great, run fast, and are collaborative.

## EXPERIENCE

---

### Web Developer, CMMND

Dec 2020 - Jan 2021

- Built a custom website single handedly using React, Next.JS, Shopify, and Node JS
- Used Three.JS and React-Three-Fiber to create optimized and performance efficient WebGL renders
- Integrated Shopify using their API

### Audio Engineer, PC Music

Jan 2019 - Jan 2021

- Made sure that all performers were connected properly to vocal plugin station. Over 10 difference performances with unique setups were adjusted for.
- Handled audio for A-List celebrity Charli XCX and other big artists
- Over 1000 people in the audience, sold out show.

### Sales Associate, Verizon (Victra)

Aug 2017 - Aug 2018

- Sold over 700 devices within the one year I was there
- Spoke to customers directly about their issues and flipped them into sales for new devices.
- Created a system for handling all non-sales related job tasks so co-workers could have an easier time
- Had to customer service anyone who walked in

### Web Developer, Los Alamitos HS Vocal Music Program

Jun 2016 - Aug 2016

- Developed Wordpress website to automate vocal program's summer program registration. Decreased manual labor time.
- Designed pamphlets that were coordinated with the website.
- Registered over 500 unique students per summer since. Around \$50-150k sales.

## PROJECTS

---

### Emotional Intelligence Trainer

Over the past year I have been improving my own mental health with therapy so I built a self care PWA that focuses on using cognitive behavioral therapy. There are multiple exercises that users can do including a daily journal, an AI cognitive search tool, and more. Made using NextJS. [Try it out here](https://eitainer.app/) (https://eitainer.app/)

### Spotify New Music Finder

I am obsessed with music and am sad that there is so much I wont be able to listen to, so I created a platform where users can choose between lots of different options to help find new music. This tool was made using React and the Spotify Web API. [Try it out here](https://spotifymusicfinder.xyz/) (https://spotifymusicfinder.xyz/)

### Chord Progression 3D Viewer

As a musician who learned from playing instruments rather than from theory, I fail at understanding what some chords are. I know what sounds good, but do not know the chord names, so I made this website that lets you play chords with your keyboard and it tells you what chords they are. Made with React. [Try it out here](https://orb) (https://orb)

## EDUCATION

---

### Bachelor of Arts, Psychology

Aug 2018 - Jan 2021

University of California, Los Angeles

### Transfer, Computer Science BS

Sep 2016 - Jul 2018

Long Beach City College

GPA: 3.8

## SKILLS

---
