WORK EXPERIENCE:

Freelance Web Development 2016 - present

created websites for local businesses using different technologies including html, css, javascript & react

AAA Authorized Agent Website

created a front page consisting of a slideshow, and cms integrated text ux components.

built a price modal page that showed different coverage costs averages with a tool that let the user pick between vehicle type and insurance type

lastly made a contact form that sends to a node server which then sends a nicely formatted email to the user and my client

built with react

Student VISA Website

created a front page with a slideshow and an email subscriber

built an about page with cms so that the client can change content even if im not present

built with html/css/js

MS Liquor Convenience Store Website

created a whole website with alcohol inventory with search bar

used strapi cms to set the alcohol inventory and created page for

people to request new craft beers

worked on launch page for delivery service

Dental Choy Dentist Website

built launch page for dentist with contact information
